

ASX Announcement | 26 September 2024
Variscan Mines Limited (ASX:VAR)

FULLY UNDERWRITTEN RIGHTS ISSUE TO ADVANCE NOVALES-UDIAS ZINC PROJECT & CORPORATE DEVELOPMENT

Highlights

- Fully underwritten renounceable Entitlement Offer to raise approximately \$2.067m
- Significant support from Variscan's major shareholder and attracting new sophisticated and professional investors
- Funds to be used to accelerate exploration and drilling programs and development studies at the high grade zinc Novales-Udias project in Cantabria, northern Spain and for corporate and operational working capital

Variscan Mines CEO, Stewart Dickson, commented on the Rights Issue:

"To successfully raise funds in this market and to bring in new first-rate investors, is a huge endorsement of our high-quality zinc development projects in Spain and the progress made to date. We look forward to using the funds raised to continue to principally advance the Novales-Udias Project towards production. Key deliverables are drilling results, an updated Mineral Resource Estimate and the Mine Re-start Study. These are all value accretive development milestones. The Board considers this attractively priced Rights Issue will allow all shareholders to participate equally in our future growth with the confidence that it is well supported.

Our exploration team are very excited to following-up and drill-testing the recently announced high grade sampling results at the Udias Mine complex. With supporting studies about to start, we are poised to unlock further value from one of the highest-grade, development stage zinc deposits in Europe, which is continuing to make good progress towards re-starting production.

We have always maintained our growth mindset. Having the opportunity to evaluate additional zinc projects in Europe providing potential exploration upside and further company-level scale to the advanced, de-risked projects we currently own in Spain is attractive.

The Board welcomes the support we have received from our largest shareholder and other sophisticated and professional investors, and recommend the Renounceable Entitlement Offer to shareholders."

Competent Person Statement

The information in this announcement that relates to technical information about the Novales-Udias project is based on, and fairly represents information and supporting documentation compiled and reviewed by Dr. Mike Mlynarczyk, Principal of the Redstone Exploration Services, a geological consultancy acting as an external consultant for Variscan Mines. Dr. Mlynarczyk is a Professional Geologist (PGeo) of the Institute of Geologists of Ireland, and European Geologist (EurGeol) of the European Federation of Geologists, as well as Fellow of the Society of Economic Geologists (SEG). With over 10 years of full-time exploration experience in MVT-style zinc-lead systems in several of the world's leading MVT provinces, Dr. Mlynarczyk has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" ('JORC Code'). Dr. Mlynarczyk consents to the inclusion in the report of the matters based upon the information in the form and context in which it appears.

The information in this document that relates to previous exploration results was prepared pre-2012 JORC code. It is the opinion of Variscan that the exploration data is reliable. Although some of the data is incomplete, nothing has come to the attention of Variscan that causes it to question the accuracy or reliability of the historic exploration.

Project Summary

The Novales-Udias Project is located in the Basque-Cantabrian Basin, some 30km southwest from the regional capital, Santander. The project is centred around the former producing San Jose underground mine with a large surrounding area of exploration opportunities which include a number of satellite underground and surface workings and areas of zinc anomalism identified from recent and historic geochemical surveys. Variscan has delineated a significant 9km mineralised trend and a sub-parallel 3km trend from contemporary and historical data across both the Buenahora exploration and Novales mining permits.

The San Jose Mine is nearby (~9km) to the world class Reocin Mine which is the largest known strata-bound carbonate-hosted Zn-Pb deposit in Spain¹ and one of the world's richest MVT deposits². Further it is within trucking distance (~80km) from the San Juan de Nieva zinc smelter operated by Asturiana de Zinc (100% owned by Glencore). Significantly, the Novales-Udias Project includes a number of granted mining tenements³.

Novales-Udias Project Highlights

- Near term zinc production opportunity (subject to positive exploration and development work)
- Maiden JORC compliant Mineral Resource Estimate of 1.08 Mt at 9% Zn defined in Q4/2023
- Large tenement holding of +100 km² (including a number of granted mining tenements)
- Regional exploration potential for further discoveries analogous to Reocin (total past production and remaining resource 62Mt @ 8.7% Zn and 1.0% Pb^{4,5})
- Novales Mine is within trucking distance (~ 80km) from the zinc smelter in Asturias
- Classic MVT carbonate hosted Zn-Pb deposits
- Historic production of high-grade zinc; average grade reported as ~7% Zn⁶
- Simple mineralogy of sphalerite – galena – calamine
- Mineralisation is strata-bound, epigenetic, lenticular and sub-horizontal
- Reported historic production of super high grade 'bolsas' (mineralised pods and lenses) commonly 10-20% Zn and in some instances +30% Zn⁷
- Assay results of recent targeted grab samples taken from within the underground Novales Mine recorded 31.83% Zn and 62.3% Pb⁸
- Access and infrastructure all in place
- Local community and government support due to historic mining activity

⁵ Cautionary Statement: references in this announcement to the publicly quoted resource tonnes and grade of the Project are historical and foreign in nature and not reported in accordance with the JORC Code 2012, or the categories of mineralisation as defined in the JORC Code 2012. A competent person has not completed sufficient work to classify the resource estimate as mineral resources or ore reserves in accordance with the JORC Code 2012. It is uncertain that following evaluation and/or further exploration work that the foreign/historic resource estimates of mineralisation will be able to be reported as mineral resources or ore reserves in accordance with the JORC Code 2012.

⁶ These figures have been taken from historical production data from the School of Mines in Torrelavega historical archives.

⁷ Reports of the super high-grade mineralisation are supported with historical production data from the School of Mines in Torrelavega historical archives. (Refer ASX release 29 July 2019)

1.6 Lead Manager

Whairo Capital Pty Ltd (ACN 618 944 568) (Corporate Authorised Representative (number 1282684) of Redleaf Securities Pty Ltd (ACN 606 000 800) the holder of Australian Financial Services Licence number 510097) (**Lead Manager** or **Whairo**) has been appointed as the lead manager of the Offer. Terms of the lead manager mandate and total fees payable are set out in Section 6.4.3 below.

1.7 Underwriting and sub-underwriting

The Offer is fully underwritten by Whairo (**Underwriter**). Refer to Section 6.4.1 for details of the terms of the underwriting.

The Underwriter has entered into sub-underwriting agreements with the following five entities (**Sub-Underwriters**) in respect of the Shortfall Securities such that the Offer is fully sub-underwritten.

- (a) Zinc GroupCo who has agreed to sub-underwrite up to A\$1,000,000;
- (b) Powerhouse Ventures Ltd who has agreed to sub-underwrite up to \$250,000;
- (c) Offelbar Pty Ltd who has agreed to sub-underwrite up to \$250,000;
- (d) Kalonda Pty Ltd who has agreed to sub-underwrite up to \$500,000; and
- (e) Spelt Kent Pty Ltd who has agreed to sub-underwrite up to \$67,335,

Refer to Section 6.4.2 for summaries of the agreements entered into with the Sub-Underwriters.

Other than as set out in Section 1.9, no sub-underwriter will increase their shareholding to above 19.99% as a direct result of the issue of Securities under the Offer. Where Shares are issued pursuant to the exercise of New Options, the voting power of the sub-underwriters who exercise their New Options will increase. The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

1.8 Effect on Control – Whairo

The Underwriter is presently not a Shareholder and is not a related party of the Company for the purposes of the Corporations Act. The issue of Shares under this Prospectus to the Underwriter may increase its interest in the Company and dilute the Shareholding of other Shareholders to the extent they elect not to participate in the Offer or are ineligible to participate in the Offer.

Other than as set out in Section 1.9, the Underwriter will allocate the Shortfall to sub-underwriters and/or clients and people who have otherwise agreed to assist with the completion of the Offer such that neither the Underwriter, the sub-underwriters nor any of

the Underwriter's clients, individually, will have a voting power in the Company in excess of 19.9% after the issue of the Shortfall.

1.9 Effect on Control – Zinc GroupCo Sub-Underwriting

Zinc GroupCo is presently the Company's largest substantial holder and is not a related party of the Company for the purposes of the Corporations Act. The issue of Shares under this Prospectus to Zinc GroupCo may increase its interest in the Company and dilute the Shareholding of other Shareholders to the extent they elect not to participate in the Offer or are ineligible to participate in the Offer.

Zinc GroupCo has confirmed that it will not take up its Entitlement under the Offer.

As at the date of this Prospectus, Zinc GroupCo has a voting power of 22.57% (100,000,000 Shares).

Pursuant to the sub-underwriting agreement between the Underwriter and Zinc Group Co, Zinc GroupCo may only take up a maximum of 142,857,142 Shares and 35,714,285 Options (**Zinc GroupCo Sub-Underwritten Amount**) under the Offer equating to a maximum aggregate holding by Zinc GroupCo of 242,857,142 Shares which would result in a maximum potential shareholding of 33% upon completion of the Offer.

No breach of section 606 of the Corporations Act will occur as such subscription and issue of Shares will fall within the exception to section 606 of the Corporations Act under Item 10 of section 611 of the Corporations Act.

Zinc GroupCo has informed the Company that it:

- (a) has no intention of making any significant changes to the business of the Company or its board of directors;
- (b) does not currently intend to inject further capital into the Company (other than in the event it is required to partially underwrite the Offer) but reserves the right to participate in further capital raisings of the Company;
- (c) has no intention of making changes regarding the future employment of the present employees of the Company;
- (d) has no intention to redeploy any fixed assets of the Company;
- (e) has no intention to transfer any property between the Company and any other entity; and
- (f) has no intention to change the Company's existing policies in relation to financial or dividend policies.

These present intentions are based on information concerning the Company, its business and the business environment which is known to Zinc GroupCo at the date of this Prospectus.

1.10 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 40% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by a further of, approximately, 17.13% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

Further, subject to Shareholder approval of the issue of the Options the subject of the Lead Manager Offer and Underwriter Offer at the Meeting, subsequent exercise of any or all of the Underwriter Options and Lead Manager Options will result in further dilution.

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

HOLDER	HOLDING AS AT RECORD DATE	% AT RECORD DATE	ENTITLEMENTS UNDER THE OFFER	HOLDINGS IF OFFER NOT TAKEN UP	% POST OFFER
Shareholder 1	10,000,000	2.26%	6,666,667	10,000,000	1.35%
Shareholder 2	5,000,000	1.13%	3,333,333	5,000,000	0.68%
Shareholder 3	1,500,000	0.34%	1,000,000	1,500,000	0.20%
Shareholder 4	400,000	0.09%	266,667	400,000	0.05%
Shareholder 5	50,000	0.01%	33,333	50,000	0.01%

Notes:

1. This is based on a share capital of 443,000,368 Shares as at the date of the Prospectus and assumes no Options currently on issue or other Shares are issued including New Options are exercised.
2. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Underwriting and Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your Application monies being applied to your Entitlement in respect of only

one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(b) **By Electronic Funds Transfer (overseas applicants)**

For payment by Electronic Funds Transfer (**EFT**) for overseas Eligible Shareholders, please follow the instructions on the Entitlement and Acceptance Form. - (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

2.6 Minimum subscription

As the Offer is fully underwritten, there is no minimum subscription.

2.7 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer. (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.007 being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement, you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Eligible Shareholders who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Securities under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Securities in accordance with Section 2.4.

Allocation of the Shortfall Securities will be as follows:

- (a) firstly, Shortfall Securities will be allocated to Eligible Shareholders who have subscribed for their full Entitlement and applied for Shortfall Securities. If the Shortfall Offer is oversubscribed (i.e. the number of Shortfall Securities applied for exceeds the Shortfall), scale back will be applied to applications under the Shortfall Offer at the discretion of the Board (in consultation with the Underwriter),

including by reference to the Eligible Shareholders' voting power and the number of Shortfall Securities applied for by the Eligible Shareholder. There is no guarantee that Eligible Shareholders will receive Shortfall Securities applied for under the Shortfall Offer; and

- (b) secondly, Shortfall Securities will be allocated subject to the terms of the Underwriting Agreement, details of which are set out in Section 6.4.1.

The Board notes that no Securities will be issued to an applicant under this Prospectus or via the Shortfall Offer if the issue of Securities would contravene the takeover prohibition in section 606 of the Corporations Act. Similarly, no Securities will be issued via the Shortfall Offer to any related parties of the Company.

2.8 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Securities now offered for subscription.

The Company will not apply for Official Quotation of the New Options issued pursuant to this Prospectus. The Company may consider applying for quotation of the New Options in the future, subject to meeting all regulatory and ASX Listing Rule requirements. There is no commitment or guarantee that this will occur.

2.9 Issue of Securities

Securities issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Securities issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Securities issued is less than the number applied for, or where no issue is made surplus Application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Securities issued under the Offer will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

2.10 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Shares will not be issued to Shareholders with a registered address which is outside Australia, New Zealand, Germany, Spain, Singapore or United Kingdom (together, the **Permitted Jurisdictions**).

New Zealand

This Offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act 2001 (Aust) and

regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

This Offer and the content of the offer document are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act 2001 (Aust) and the regulations made under that Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

The Offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

Nominees and custodians

Nominees and custodians may not submit an Entitlement and Acceptance Form on behalf of any Shareholder resident outside the Permitted Jurisdictions without the prior consent of the Company, taking into account relevant securities law restrictions. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

2.11 Appointment of Nominee

Pursuant to ASX Listing Rule 7.7 and section 615 of the Corporations Act, the Company has appointed a nominee, Whairo, to sell the Entitlements to which Ineligible Shareholders are entitled. The nominee will have the absolute and sole discretion to determine the timing and price at which the Entitlements may be sold and the manner of any such sale. The Company will seek to obtain ASIC approval for the appointment of the nominee, as required by section 615 of the Corporations Act.

The proceeds of the sale of these Entitlements will firstly be applied against expenses of such sale, including brokerage, and any balance will accrue to the relevant Ineligible Shareholders as described below.

The net proceeds of the sale of these Entitlements will then be forwarded by the Company as soon as practicable to the Ineligible Shareholders, in proportion to their share of such Entitlements (after deducting brokerage commission and other expenses). If any such net

proceeds of sale are less than the reasonable costs that would be incurred by the Company for distributing those proceeds, such proceeds may be retained by the Company.

Notwithstanding that the nominee must sell Entitlements, Ineligible Shareholders may nevertheless receive no net proceeds if the costs of the sale are greater than the sale proceeds. In this regard, the nominee will not be required to sell Ineligible Shareholders' Entitlements at a particular price.

Shareholders resident in Australia or New Zealand holding Securities on behalf of persons who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

4.1 Rights and liabilities attaching to Shares

The following is a summary of the more significant rights and liabilities attaching to the Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company. The Company's constitution permits the use of technology at general meetings of shareholders (including wholly virtual meetings) to the extent permitted under the Corporations Act, Listing Rules and applicable law.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. 5. RISK FACTORS

The Securities offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.1 Company specific

RISK CATEGORY	RISK
Potential for dilution	<p>In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 40% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).</p> <p>No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by an aggregate of approximately 17.13% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).</p> <p>It is not possible to predict what the value of the Company, a Share or an Option will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.</p> <p>The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.01 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.</p>
Control risk - Whairo	<p>The Underwriter has entered into sub-underwriting agreements with five sub-underwriters, including Zinc GroupCo. In the unlikely event that the Sub-Underwriters could not settle their obligations under the sub-underwriting agreements, the Underwriter would need to take up the remaining Shortfall.</p> <p>As set out in Section 1.8 above, other than as set out in Section 1.9, the Underwriter will allocate the Shortfall to sub-underwriters and/or clients and people who have otherwise agreed to assist with the completion of the Offer such that neither the Underwriter, the sub-underwriters nor any of the Underwriter's</p>

RISK CATEGORY	RISK
	<p>clients, individually, will have a voting power in the Company in excess of 19.9% after the issue of the Shortfall. As such, the Board considers the control risk associated with the Underwriter is mitigated.</p>
<p>Control risk - Zinc GroupCo Pty Ltd</p>	<p>Zinc GroupCo is currently the largest Shareholder of the Company and has a relevant interest in approximately 22.57% of the Shares in the Company. Zinc GroupCo has also agreed to partially sub-underwrite the Offer.</p> <p>Assuming Zinc GroupCo takes up only the Zinc GroupCo Sub-Underwritten Amount (i.e Zinc GroupCo does not take up its Entitlement under the Offer), Zinc GroupCo's voting power in the Company could be as high as 33%.</p> <p>Zinc GroupCo's significant interest in the capital of the Company means that it is able to potentially influence the financial decisions of the Company, and its interests may not align with those of all other Shareholders.</p> <p>Upon completion of the Offer, Zinc GroupCo may hold a relevant interest in more than 25% of the Company (refer above to Section 1.8 for the potential voting power of Zinc GroupCo in various scenarios). If Zinc GroupCo's interest was to increase above 25%, it would mean that it would have the potential to prevent a special resolution from being passed by the Company (such resolution requiring at least 75% of the votes cast by members entitled to vote on the resolution). Special resolutions are required in relation to approve certain Company matters including potentially seeking the delisting of the Company, amending the Constitution, approving the voluntary winding up of the Company and, if at any time the share capital of the Company is divided into different classes of Shares, approving the variation of the rights attached to any such class.</p>
<p>Additional requirements for capital</p>	<p>The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p>
<p>Going Concern</p>	<p>The Company's 31 December 2023 half year financial report (Financial Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>Notwithstanding the 'going concern' qualification included in the Financial Report, the Directors believe that upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company's current exploration commitments and short-term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long-term working capital costs of the Company.</p>

RISK CATEGORY	RISK
	<p>In the event that the Offer is not completed successfully there is significant uncertainty as to whether the Company can continue as a going concern which is likely to have a material adverse effect on the Company's activities.</p>
<p>Exploration and Operations</p>	<p>The mineral exploitation concessions comprising the Company's projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.</p> <p>There can be no assurance that future exploration of these licences, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.</p> <p>The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Company.</p> <p>The success of the Company will also depend upon the Company being able to maintain title to the exploitation concessions comprising its projects and obtaining all required approvals for their contemplated activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the projects, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the concessions comprising the projects.</p>
<p>Sovereign risk</p>	<p>The Company's projects are located in Australia, Spain and Chile.</p> <p>Possible sovereign risks associated with operating in Spain and Chile include, without limitation, changes in the terms of mining legislation, changes to royalty arrangements, changes to taxation rates and concessions and changes in the ability to enforce legal rights. Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its shares.</p>
<p>Operations in Spain</p>	<p>The Company is subject to governmental, political, economic, and other uncertainties in Spain including, but not limited to, expropriation of property, changes in mining policies or the personnel administering them, all of which could affect the Company's access to its projects and subsequent exploration and development.</p> <p>Adverse changes in government policies or legislation in Spain affecting foreign ownership of mineral interests, taxation, profit repatriation, royalties, land access, labour relations, and mining and exploration activities may affect the operations of the Company.</p>
<p>Enforcing liabilities against assets outside of Australia</p>	<p>Much of the Company's assets are located outside Australia. As a result, it may be difficult to enforce judgments obtained in Australian courts against those assets. In addition, there is</p>

RISK CATEGORY	RISK
	<p>uncertainty as to whether the courts of the Spain and or any other jurisdiction in which the Company may operate would recognise or enforce judgments of Australian courts based on provisions of the laws of Australia. Furthermore, because the majority of the Company's assets are or will be located outside Australia, it may be difficult to access those assets to satisfy an award entered for the Company in Australia. Consequently, Shareholders may have more difficulty in protecting their interests as a result of actions taken by management, the Board or controlling Shareholders than they would as shareholders of a company with assets in Australia.</p>
Title Risk	<p>The Company holds exploitation and research concessions which are not subject to a renewal process other than the payment of an annual fee, except for the San José permit which is pending approval of the Restoration Plan. The Company could lose ownership or its interest in the concessions if sufficient funds were not available to meet the statutory payments. Exploitation concessions are subject to a specific term and therefore do have an expiry date. Concessions are usually for 30 years, extendable to 60 years and a maximum of 90 years. The San José concession is now in the middle of its first extension.</p> <p>Government approvals and permits are currently, and may in the future be, required in connection with the Company's operations. To the extent such approvals are required, and not obtained, the Company may be curtailed or prohibited from proceeding with planned exploration or development of its projects.</p>
Aboriginal significant sites	<p>The Company is required by Commonwealth and State legislation to identify and protect sites of significance to Aboriginal custom and tradition.</p> <p>It is possible that one or more sites of significance will exist in one or more of the Company's prospective projects. If any such sites are identified it may have the potential to halt exploration activities and impact upon the planning and implementation of future exploration programmes in circumstances where a declaration is made for the protection and preservation of the site or object.</p> <p>A halt to exploration activities on certain tenements may adversely affect the profitability of the Company.</p>

5.2 Industry specific

RISK CATEGORY	RISK
Exploration Costs	<p>The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely impact the Company's viability.</p>
Resource and Reserves and Exploration Targets	<p>The Company has identified a number of exploration targets based on geological interpretations and limited geophysical data, geochemical sampling and historical drilling. Insufficient data however, exists to provide certainty over the extent of the mineralisation. Whilst the Company intends to undertake</p>

RISK CATEGORY	RISK
	<p>additional exploratory work with the aim of defining a resource, no assurances can be given that additional exploration will result in the determination of a resource on any of the exploration targets identified. Even if a resource is identified no assurance can be provided that this can be economically extracted.</p> <p>Reserve and resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when initially calculated may alter significantly when new information or techniques become available. In addition, by their very nature resource and reserve estimates are imprecise and depend to some extent on interpretations which may prove to be inaccurate.</p>
Grant of future authorisations to explore and mine	<p>If the Company discovers an economically viable mineral deposit that it then intends to develop, it will, among other things, require various approvals, licence and permits before it will be able to mine the deposit. There is no guarantee that the Company will be able to obtain all required approvals, licenses and permits. To the extent that required authorisations are not obtained or are delayed, the Company's operational and financial performance may be materially adversely affected.</p>
Mine Development	<p>Possible future development of mining operations at the Projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.</p> <p>If the Company commences production on one of the Projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company. No assurance can be given that the Company will achieve commercial viability through the development of the Projects.</p> <p>The risks associated with the development of a mine will be considered in full should the Projects reach that stage and will be managed with ongoing consideration of stakeholder interests.</p>
Regulatory Compliance	<p>The Company's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. The Company requires permits from regulatory authorities to authorise the Company's operations. These permits relate to exploration, development, production and rehabilitation activities.</p> <p>While the Company believes that it is in substantial compliance with all material current laws and regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to the Company or its properties, which could have a material adverse impact on the</p>

RISK CATEGORY	RISK
	<p>Company's current operations or planned development projects.</p> <p>Obtaining necessary permits can be a time-consuming process and there is a risk that Company will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the concessions.</p>
<p>Environmental</p>	<p>Mining and exploration has become subject to increasing environmental responsibility and liability in Australia and Chile, and is largely untested on this scale in Spain. The potential for liability is an ever-present risk.</p> <p>The use and disposal of chemicals in the mining industry is under constant legislative scrutiny and regulation. Exploration work will be carried out in a way that causes a minimum impact on the environment. Consistent with this, the Company may be required, in some cases, to undertake baseline environmental studies prior to certain exploration or mining activities, so that the environmental impact can be monitored and, as far as possible, minimised.</p> <p>While the Company is not presently aware of any endangered species of fauna and flora within any of its projects, no baseline environmental studies have been undertaken to date, and discovery of such could prevent further work in certain areas. The discovery of any endangered species of fauna and flora may impact upon our ability to freely explore the Company's projects.</p>
<p>Climate Risk</p>	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <p>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</p> <p>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as</p>

RISK CATEGORY	RISK
	shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.
Commodity price volatility and exchange rate	<p>If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.</p> <p>Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets</p>
Competition	The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company.

5.3 General risks

RISK CATEGORY	RISK
Economic	General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>

RISK CATEGORY	RISK
Litigation risks	The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.
Dividends	Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.</p>
Reliance on key personnel	The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.
Economic conditions and other global or national issues	<p>General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p> <p>General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.</p>
